

About the Seminar

The Indian economy is at a critical juncture, poised for transformative changes as it aims to establish itself as a global economic powerhouse. This period of rapid development presents a unique opportunity for India to harness its growth potential while addressing significant challenges related to inequality and employment. The upcoming conference seeks to evaluate India's readiness for this transformation by focusing on key sectors—Agriculture, Industry, Services, and the Informal Economy—and exploring strategies to ensure sustainable and inclusive growth.

Sectoral Growth Potential is a primary focus of the conference. In Agriculture, advancements in technology and productivity improvements are critical for enhancing food security and rural livelihoods. Initiatives aimed at rural development and technological integration can drive substantial progress in this sector. In the Industrial sector, growth is driven by technological innovation and infrastructure development. The conference will assess how these factors contribute to creating a robust and competitive industrial landscape, essential for overall economic expansion. The Services sector, encompassing information technology and financial services, plays a significant role in economic growth. Evaluating the potential of these emerging industries to lead development will be crucial. Additionally, the **Informal Economy's** dynamics will be explored, with a focus on its contribution to employment and strategies for formalization.

Addressing **Inequality Reduction** is equally important. The conference will examine policies designed to bridge the rural-urban divide and improve access to essential services. Measures to address income disparities and promote equitable distribution of economic benefits will be discussed, aiming to create a more inclusive economy.

In terms of **Employment Generation**, the focus will be on identifying strategies to create job opportunities across various sectors, with an emphasis on sustainable and inclusive employment. The role of skill development, women's empowerment, and entrepreneurship will be crucial in fostering a dynamic and resilient labor market.

Finally, the conference will explore Technological and Environmental Considerations. Cleaner technologies and sustainable practices are vital for addressing climate change and promoting long-term development. The impact of technological advancements on economic growth and employment will be assessed, highlighting how technology can drive inclusive progress.

In conclusion, this conference aims to provide a comprehensive review of India's economic strategies, offering valuable insights and recommendations for achieving sustainable and inclusive economic transformation.

Paper Submission Guidelines:

All are requested to submit their full research papers/articles (within 3000 words) including abstract (300 words). Papers should be submitted to the following email ID

E-mail IDs:

- dr_skray@yahoo.co.in
- president.asimbea@gmail.com
- sanghita.bhattacharjee@womenscollegekolkata.ac.in

Paper and Abstract must be submitted either in Doc & PDF format, Times New Roman, Font size 12pt, 1.5 line spacing, justified. Also mentioning name of the author/ authors, affiliation, e-mail ID and keywords.

Note: All the Research papers/articles submitted in the seminar, after further revision, will be published in the edited Volume with ISBN.
